

# MODEL 3000 Filtered Blower

## Cools DC Motors up to 600 Horsepower!

**ELECTRA-KOOL™ FILTERED CENTRIFUGAL BLOWERS** keep your DC Motors cool, increasing their efficiency and *reducing operational costs* with clean, filtered air. Filters are mounted easily with a simple wing nut while the blower easily mounts to your motor via our rugged outlet flange.

The **ELECTRA-KOOL™ Model 3000** Filtered Blower includes:

- Rugged cast aluminum housing, outlet flange, and impeller to withstand tough factory environments.
- Baldor® Super-E Premium Efficient Motor: 10 HP, 3490 RPM motor (3ph TEFC), blowing 3000 CFM. This heavy-duty motor comes with feet for extra stability. (Support required)
- Metal Mesh Filter rated for 60% @ AC Fine Dust. Surface area of 106 ft<sup>2</sup>. Pre-filter available.
- Pleated Paper filter rated for 99+% @ 2 Micron.
- Bolts easily to your DC motor intake (7.5" circular cut-out required) and filters attach with a mounting bracket and wing nut (provided).
- Reusable filter (Metal Mesh only)–easily cleaned & reused!
- Fingerguards are installed on both the inlet and outlet for your safety.
- The motor and filter mounting locations can be switched at assembly to accommodate tight applications.

**All Model 3000 Components are Stocked!**
