

# MODEL 2000 Filtered Blower

**Cools DC Motors up to 400 Horsepower!**

## ELECTRA-KOOL™ FILTERED CENTRIFUGAL BLOWERS

keep your DC Motors cool, increasing their efficiency and *reducing operational costs* with clean, filtered air. Filters are conveniently mounted with a simple wing nut, while the blower easily mounts to your motor via our rugged outlet flange.

The **ELECTRA-KOOL™ Model 2000** Filtered Blower includes:

- Rugged cast aluminum housing to withstand tough factory environments.
- Baldor® Super-E Premium Efficient Motor: 5 HP, 3650 RPM motor (3ph TEFC), supplying 2000 CFM. This heavy-duty motor has a mounting flange. (Support required)
- Epoxy coated steel impeller with reinforcement bars.
- Metal Mesh Filter rated for 60% @ AC Fine Dust. Pleated Paper rated for 99.9% @ 2µ. Pre-filter available. Surface area of 90 ft<sup>2</sup>.
- Quick & Easy Installation! Bolts easily to your DC motor intake (7.5" circular cut-out required). Filters attach with a mounting bracket and wing nut (provided).
- Reusable filter (Metal Mesh) – easily cleaned & reused!
- Fingerguards are installed on both the inlet and outlet for your safety.
- Old School Product & Technical Support - ***we will always be there for you!***
